Audiologist's Assistant Program

About Program

The audiologist's assistant program prepares students to assist licensed audiologists. Enrollment is open to all students sponsored by a licensed audiologist who will oversee the clinical training of the assistant.

The audiologist's assistant works under the supervision of an audiologist, to help the audiologist work more productively. Our program at NSU prepares the student to work under the supervision of a licensed audiologist, performing selected tasks in patient assessment and working with hearing aids and other amplification systems.

The Audiologist's Assistants program at NSU is 100% distance learning. Students access a Web site that contains all of their course related resources.
