Non-Credit Instruction

- Guest lectured on pediatric vestibular assessment. Guest Lecture, Louisiana State University-Audiology, 7 participants. (March 12, 2024).
- Guest lectured on pediatric vestibular assessment. Guest Lecture, University of the Pacific Audiology Department, 20 participants. (June 1, 2022).
- Guest lecture about the VOR pathway and clinical testing. Guest Lecture, Athletic Training-University of West Florida, 2 participants. (May 24, 2022).
- Guest lecture about the VOR pathway and clinical testing. Guest Lecture, College of Optometry, 100 participants. (March 14, 2022).
- Students are given two patient case histories and are asked to make diagnosis and management plan for each patient. Based on the two histories, students must order additional test results. They are given 20 minutes to order tests, interpret results, determine a differential diagnosis, and create a management plan for both cases. The student then must defend their decisions to the comprehensive exam committee. Objective Structured Clinical Exam (OSCE), Nova Southeastern University, Audiology Department, 18 participants. (January 24, 2021).
- Guest lecture about the VOR pathway and clinical testing. Guest Lecture, College of Optometry, 100 participants. (October 2020).
- Guest lectured on my experiences being a vestibular audiologist. Guest Lecture, Pacific University Audiology Department, 28 participants. (July 8, 2020).
- Guest lectured about the Interprofessional Fall Prevention Clinic in the Interprofessional Practice class for audiology. Guest Lecture, Department of Audiology- IPE Class, 18 participants. (July 6, 2020).

Thanks Patricia Gaffney, AuD (Professor of Audiology at Nova Southeastern University & President Elect of American Academy of Audiology) for joining me on the Future Ear Radio podcast this week.

During this episode, Tish and I discuss:

- Her backstory, how she ended up in Audiology, and her path to becoming a Professor at Nova Southeastern University
- Getting involved early in her career with various professional organizations, which she attributes as a major accelerant to her career's growth
- The value of actively building one's professional network
- Her specialization in vestibular diagnostics and the growing interest in the vestibular side of Audiology among young professionals
- A brief overview of the trends happening in the nascent field of pediatric vestibular diagnostics
- The American Academy of Audiology's goals in 2024 and beyond
- How Hearing Professionals can "extend themselves" by imparting their institutional knowledge to allied medical professionals

- Dr. Syms' ListenUp! Podcast. (October 6, 2022).
In this episode... While there are professional guidelines that have been in place for decades, there were no practice standards in the industry until recently. The bottom line is well-established, but there is much less precedent for clear professional standards. If audiologists are to improve, they need goals and benchmarks to strive after. Fortunately, those standards are now being developed. Dr. Patricia Gaffney once served as President for the Audiology Practice Standards Organization. The organization is filled with leaders in the industry, working together as they attempt to define practice standards across the board. So what are these standards and how can it influence the landscape of audiological practices? Dr. Mark Syms speaks with Dr. Patricia Gaffney, a professor at NOVA Southern University in Fort Lauderdale, on this episode of ListenUp! to discuss audiology practice standards. They discuss what the Audiology Practice Standards Organization does and how they have defined their guidelines. They touch on Dr. Gaffney's career, what the future holds for audiology practices, and the differences between guidelines and standards.

The Hearing Journal Imaging a world without standardized safety regulations for healthcare procedures. How safe would you feel seeking medical care? Dr. Emily McMahan and Dr. Patricia Gaffney from the Audiology Practice Standards Organization discuss why standards are important, why we need them, what they are, and why we don't already have them for the field of audiology.

- Signia Podcast on AudiologyOnline. (November 22, 2021).
Do audiologists really need standards regarding the practice of clinical audiology? At least one group of audiologists thinks so, and that's the members of Audiology Practice Standards Organization (APSO). This organization was created a few years ago with the purpose of developing, maintaining, and promoting national standards for the practice of audiology. The APSO recently published their first standard: General Patient Intake. In this podcast, Brian Taylor talks with Patricia Gaffney, the chair of APSO, to discuss why these standards were created and how they can be implemented in any clinic.

- Conversations with Dr Amit Gosalia Podcast. (September 5, 2021).
Practice standards in audiology will affect every audiologist and is one of the most important

tasks being tackled as a profession today. Until recently, practice standards in audiology were not defined! The Audiology Practice Standards Organization (APSO) was founded for this very purpose. APSO's mission is to develop, maintain, and promote national standards for the practice of audiology which are based on current evidence, reflect best practices in the profession and are universally adopted by practitioners. Become a member, join a subject matter expert group, provide public comment when prompted and support this great initiative!
