

## Master of Occupational Therapy Program

### Personal Protective Equipment (PPE) Needed for Anatomy Labs

The anatomy faculty will be reviewing the use of these equipment. You need to purchase these devices by 5/31/2016 as they will be required in labs beginning 6/1/2016. When you have neuroanatomy in January, 2017, you will use this equipment again. The NSU Bookstore may carry this equipment, but you may also obtain them online. We have listed websites for these products, but you may find them online through various vendors.

- Nitrile gloves. Order a box of 100. They are sized small, medium, large or extra-large. Nitrile gloves are available at Cosco, many pharmacies, and even Walmart.
- Disposable isolation gowns. Proadvantage is a manufacturer used by the medical sciences department. Order a package of 50.
